1 Company overview

Who we are : Development of a **new Toxin brand** manufactured in **Indonesia**

***1st toxin specialized
manufacturer and R&D center in Indonesia***

Company profile

- Establishment: September 2022
- Location: Cikarang (facility) and Depok (R&D)
- Total Floor Area: 18,469.36m²
- Business area: Botulinum toxin products
- Representative: Kang Dong-min
- Financial Status : 460억 (2023.12 기준)

1 Company overview

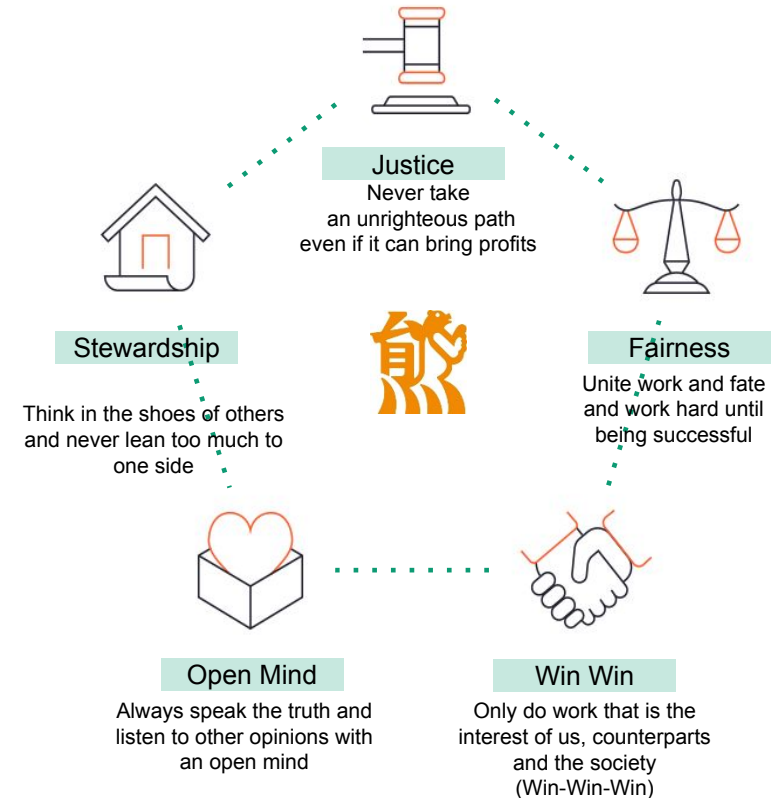

Vision

2030 Global Leading
Biopharmaceutical Company

Mission

To be a world-class leader in toxin
production and distribution excellence

Core Value

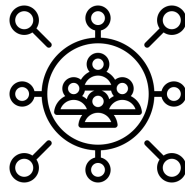

1 Company overview

Selatox is expanding globally **through Indonesia** - our **strategic bio hub** that combines vast market potential, open trade access to the world and limitless opportunities.

Market Potential

- ✓ Population: 278M (4th globally)
- ✓ GDP Growth: 5.3% ('23)
- ✓ Pharma Market: \$12.5B (13% YoY↑)

Talented Workforce

- ✓ Working Age Pop: 185M
- ✓ Median Age: 29.7

Open trade Gate way

- ✓ Bridge between Asia and emerging Pacific markets
- ✓ Multiple free trade agreements

Halal Leadership

- ✓ The largest Muslim population
- ✓ Global Halal Standard

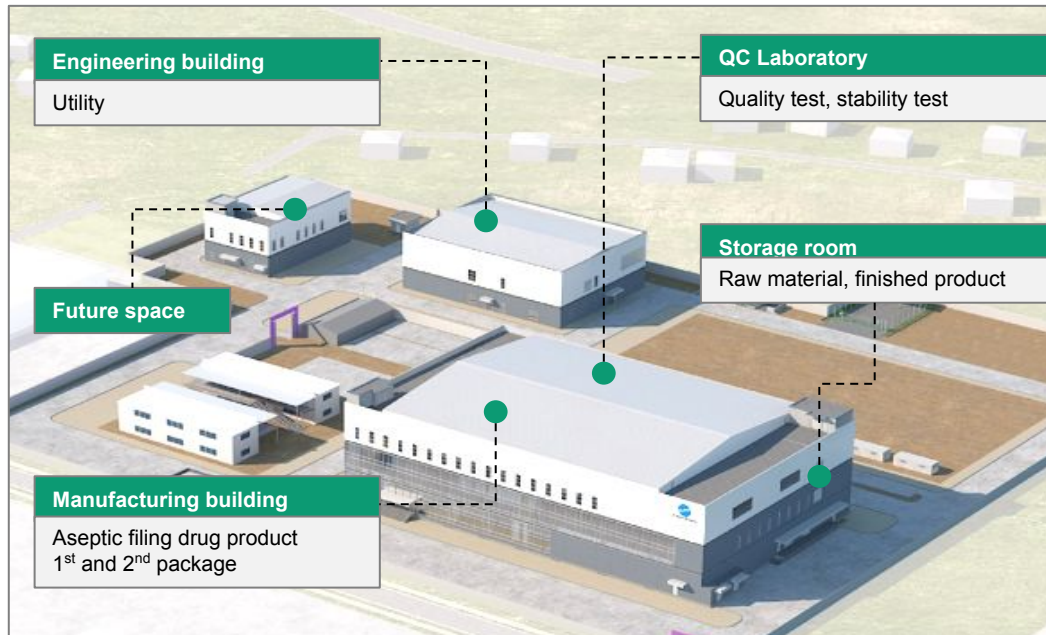

2 Facility construction

- 2022. 09 Establishment of **SELATOX**
- 2023. 03 Pile construction
04 Main construction
- 2024. 11 Technology development contract (w/ Daewoong)
12 **Construction completion (SLF application)**
- 2026. **GMP certification** and Expert approval
R&D center establishment
- 2028. **Product registration** (Indonesia)
Partnering with +40 countries
- 2030. **Global Launching** and commercialization

3 Manufacturing facility (1/7): Concept

Selatox is Indonesia's **1st toxin specialized** manufacturer

Plant features

- Site location: Cikarang, Bekasi, Indonesia
- Floor Area: 18,469.36m²
- Building Coverage Ratio: 15.73%
- Floor Area Ratio: 41.29% Scale
 - ✓ Manufacturing: 3rd Floor (22m high)
 - ✓ Engineering: 2nd Floor (15m high)
- Total 120 FTEs (two-shift)
 - ✓ Production: 60 FTEs, Quality: 50 FTEs, Admin: 10 FTEs

The state-of-the-art manufacturing process and equipment dedicated to produce
SELATOXIN (*Botulinum* toxin product)

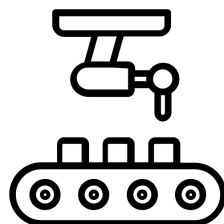

3 Manufacturing facility (2/7): Capacity

Our manufacturing facility is equipped with the most **innovative aseptic manufacturing systems**, ensuring contamination prevention throughout the production process and guaranteeing the **highest quality products**.

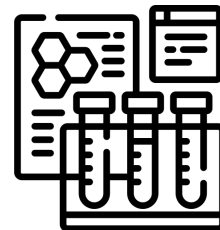

Production capacity

- 6.5M vials/year
- Total 190 lots produced
- 35,000 vials/lots

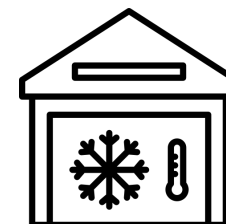

Manufacturing process

- Drug production
- Lyophilization process
- Fully automation system
- Filling speed: 200 vials/min

Quality management

- Release test (chemical, micro)
- Cell based assay
- Stability test
- Environmental monitoring
- GMP compliance

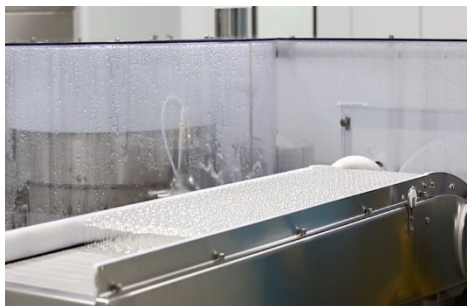

Storage

- Room temp: raw material
- Cold temp: finished product

3 Manufacturing facility (3/7): Equipment

Manufacturing equipment

[Vial washing]

[Filling] – Aseptic Process

[Capping]

[2nd Packaging]

QC laboratory

[Chemical Lab.]

[CBPA lab.]

[Microbiological Lab.]

[Stability test Lab.]

3 Manufacturing facility (4/7): GMP compliance

GMP (Good Manufacturing Practice) is essential in ensuring that pharmaceutical products consistently meet quality standards. GMP rigorously maintains safety, cleanliness, and quality across every stage of production, minimizing risks related to contamination, errors, or non-compliance.

Quality Assurance

Production Standard

Controlled Environment

3 Manufacturing facility (5/7): Global GMP system

Establishing a global GMP system **by integrating the quality system of NABOTA**, which has been certified by leading global regulatory authorities' GMP standards.

NABOTA's regulatory track record

NABOTA

Global partnership in +80 countries
Market approval in +67 countries including Indonesia (Approved, '19)

**Technology transfer and internalization
from Daewoong into SELATOX**

SELATOX

N

Market approval in Indonesia ('28)
Partnering with +40 countries
150M USD annual sales ('40E)
1.1B USD cum. sales

3 Manufacturing facility (6/7): Smart office

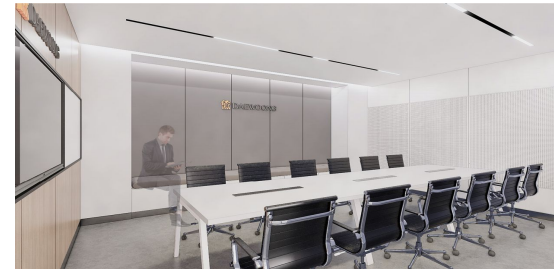

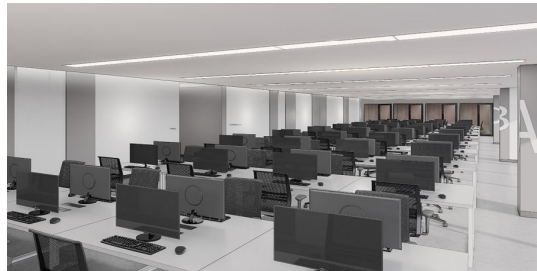

SELATOX established the optimal office environment that enhances autonomy, engagement, and efficiency, ultimately contributing to **higher performance outcomes**

Workplace environment

- ✓ Employees can freely choose the optimal space for each task.
- ✓ Work can be done anywhere, inside or outside the office, as desired.
- ✓ Increased communication between employees in related departments.
- ✓ Elimination of tasks and processes that hinder work efficiency.

Value

- ✓ Result-Only Work Environment
- ✓ Open Communication
- ✓ Sharing & Collaboration
- ✓ Agile Working

3 Manufacturing facility (7/7): Success strategy

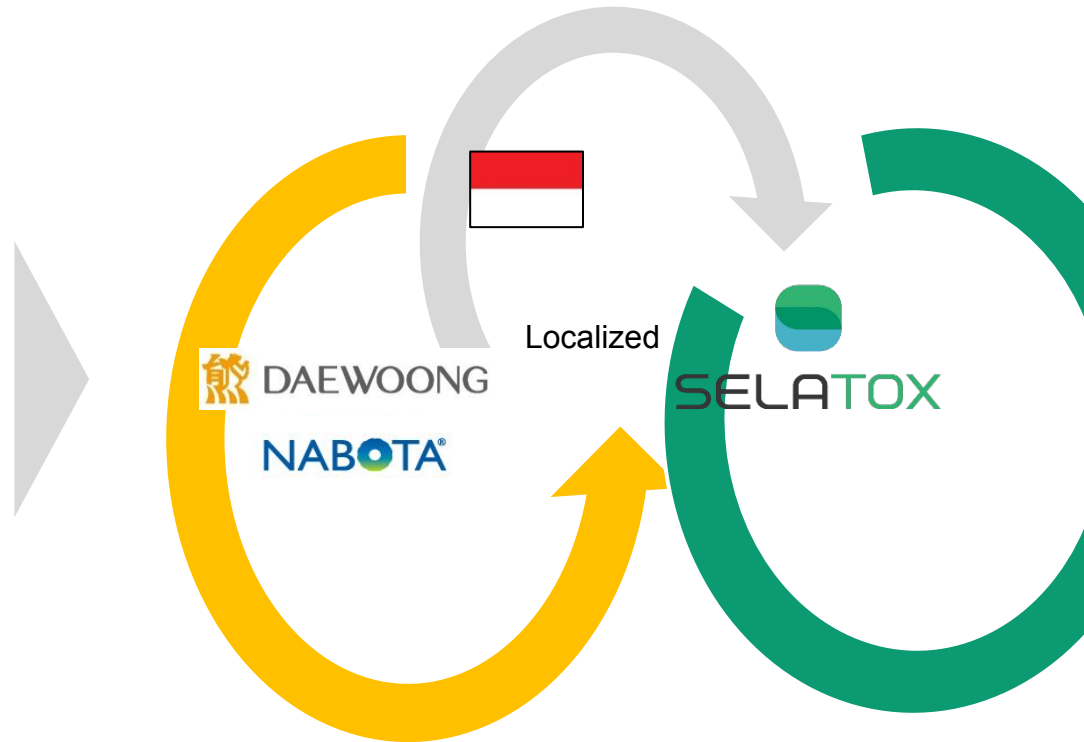

Selatox internalize the **facility concept and design**, as well as **manufacturing process and technology** which are being used for **NABOTA production**

Facility

Daewoong's **technology and know-how** in raw material selection, SOP, QMS, and manufacturing processes are utilized for the success of SELATOX project.

Human resource

Experienced researchers, technicians and regulatory affairs at Daewoong are participated in the project

4 R&D center

The **1st Toxin R&D Center** in Indonesia and **a pioneer** in Botulinum neurotoxin research

R&D Unit

[Formulation]

[Bioanalysis]

[Animal Testing]

Pipeline

- ✓ Selatox focuses on developing **HALAL-TOXIN products** to aim for the global markets.
- ✓ The development of **customer-oriented products** and the enhancement of **user convenience** are our top priorities.

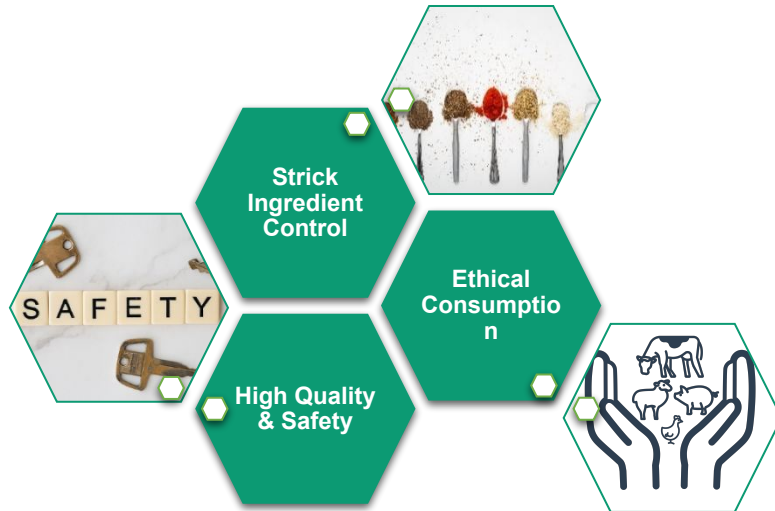

4 R&D center

Halal products provide **Trust and Satisfaction** to consumers.

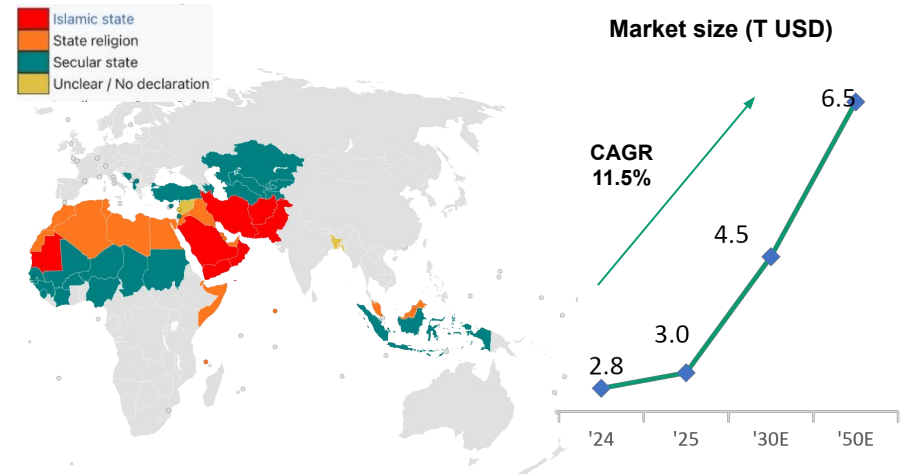

A New Trend of Customers

- ✓ Differentiated products that secure a new trend of customers who want high quality & safety, and ethical consumption.

Value of HALAL

- ✓ HALAL meets the needs of the fast-growing Muslim population (2.2B in 2030; 25% of total population).
- ✓ Halal market is expected to maintain its strong growth trajectory, showing clear signs of sustainable market expansion

4 R&D center

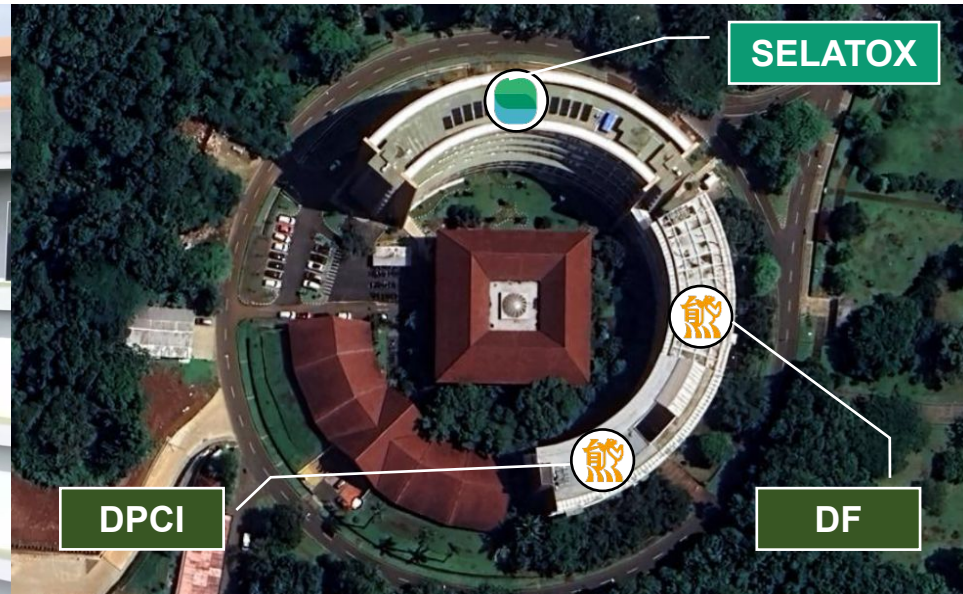

Strategic Partnership with Universitas Indonesia

Collaboration with UI

- ✓ Post-doctoral fellow
- ✓ Animal Research Center
- ✓ Co-Research of biopharmaceutical

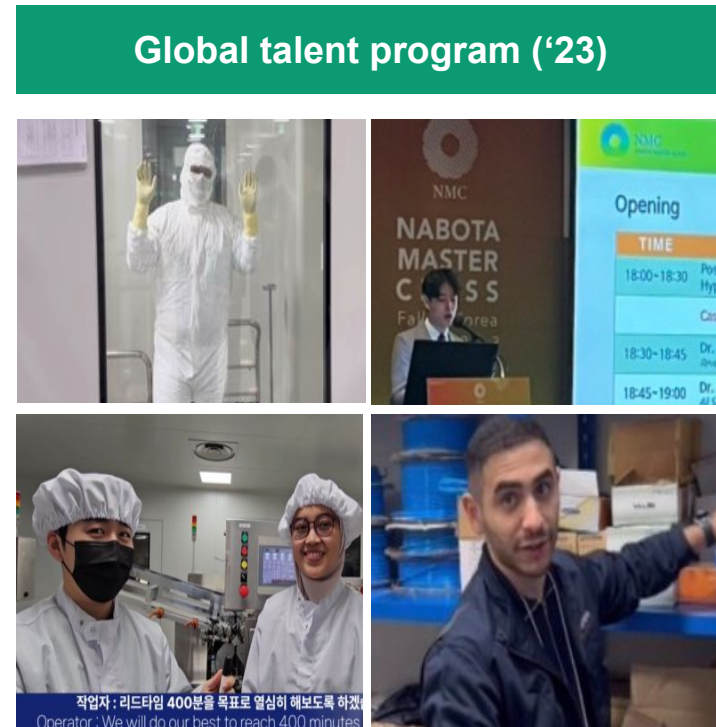

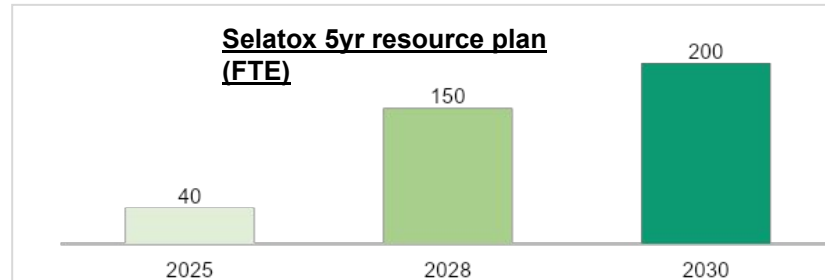

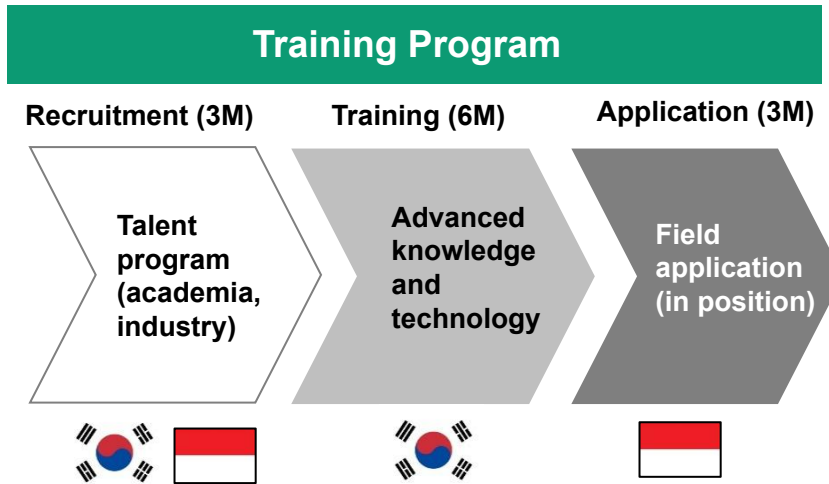

DW R&D Campus in UI

- ✓ Diversification of scientific research through specialized fields
- ✓ Research Network & Future expansion

5 Talent discovery

Daewoong operates **global talent program** to provide young Indonesians with job opportunities in various fields including production and quality, and those who have developed their skills will be joined at SELATOX

5 Talent discovery

Talent Recruitment & Development

- ✓ **Continuous recruitment** of talented Indonesian experts
- ✓ Training in **global-standard** pharmaceutical R&D and manufacturing
- ✓ Development of specialized technical expertise

Practical Experience

- ✓ Transfer of Daewoong expertise
- ✓ **Hands-on** commercial opportunities: Practical, experience-based training

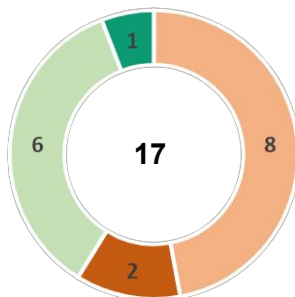

Long-term Development Plan

- ✓ Building a sustainable talent development system
- ✓ Contribution to **Indonesia's pharmaceutical industry development**
